

DSI sponsors Austin Texas Training Event

Thursday October 19th 2017

Designed Security Inc. and our area rep organization, Professional Alarm Representation (PAR), presented a local training event for the Austin area at the local Dave and Busters eatery. In attendance were integrators and consultants from Austin, Texas and the surrounding areas.

The topics of discussion included a review of the DSI optical turnstiles, tailgate detection devices, door management products, full height turnstiles and how these products interface and enhance access control.

Also discussed was the International Building Code's "Means of Egress thru Optical Turnstiles", a continuing education program developed and presented by DSI. Food and fun was enjoyed by all.

For more information regarding a training event near you contact Adam Reddell at dsisupport@dsigo.com.
